

- All plastic components are top rack dishwasher safe (with the exception of the outer plastic case of the Bento Bite which is hand wash only).
- Prior to cleaning plastic components via dishwasher, remove material components and spot clean these with damp cloth.
- Dry all parts thoroughly after washing and store with lid ajar.
- Do not use in oven.
- Freezer safe (except Bento Eats and Bento Double up)- be aware that when frozen, plastic can become brittle (particularly the clips), so we recommend to rest for a few minutes at room temperature or run under warm water before attempting to open.
- Microwave safe - microwave at 1000W max in increments of 1 minute at a time with lid open (remove cool skin from Switch up, Hybrid Bento or Smash box if microwaving and only the inner tray of the Bento Bite is microwave safe).
- Do not use abrasive cleaners containing bleach chlorine or other abrasives and harsh chemicals.
